

Covid-19 Testing Policy
Effective 01/01/2023

At River Valley Community Health, we offer the following testing only in conjunction with an office visit where medical necessity is determined:

- Rapid PCR testing (45 Minutes) industry standard – **Price \$150**
- Rapid molecular NAAT testing (15 minutes) equivalent to PCR but not always available due to supply. **Cash price \$140**
- Rapid Antigen testing (15 minutes) negative but it is recommended that symptomatic patients should also do a PCR send out test. **Cash pay price \$110**

RVH COVID 19 TESTING POLICY

- Testing at RVCH Urgent Care is available by a “drive through” visit where patient is assessed by medical provider. **We do NOT bill insurance.** Testing is by appointment only. We do not offer Covid testing without a corresponding office visit.
- During your visit a provider will determine if it is a medical necessary to be tested. Or, if other testing (such as Strep testing, Influenza testing, x-rays) and/or additional treatment is required (anti-viral or anti-biotics for example).
- If deemed medically necessary to test for COVID-19, **payment will be needed from you at time of testing.**
- However, there is no guarantee that a provider will deem it medically necessary to test, as there are CDC parameters that need to be met to be considered as such.
- If testing is NOT medically necessary, but you decide that you still want to be tested for any other reason (such as travel clearance, curiosity, return to work or school after self-quarantine, etc.) we don't depend on insurance approval to test so we can test you, but **payment is due at time of service.**
